

INTERNSHIPS
IN EUROPE

Programs in Health Sciences & Research

Think about how amazing it would be to see Europe—not as a tourist—but the way Europeans do.

Experience the rush of living and working in a dynamic city.

Strengthen your résumé with a unique professional experience.

EPA Internships are about living, working, studying in Europe for a semester—and being changed forever by the experience.

- Résumé, Cover Letter, Recommendations

Internship Placements:

- Health Education & Advocacy
- Medical Research
- Hospital Administration
- Psychology
- Psychiatry
- Biology
- Health Related Organizations
- Dental Administration

Academics:

- Semester students take Two University Classes

Student Testimonials

UK Department of Health—London, England

Teel Liddell

"Magical: the only word to accurately describe my experience. As an Intern with the UK Department of Health, I enjoyed many incredible opportunities, visiting Parliament with my supervisor being top among them. My internship gave me a valuable perspective on international healthcare that I have been able to apply to my academic and professional experiences since my return to America. In addition to working I had fun with the other EPA students and made life-long friendships. The chance to live and work as a resident in a foreign country is an experience not offered by many study abroad programs, but it's definitely worth it!"

Health Care Administration—London, England

Brittany Porter

"My internship in Health Care Administration was better than I could've imagined! I was able to shadow an anesthesiologist in the operating room as well as create podcasts for medical students. It was a tremendous learning experience, and I would highly recommend this internship to anyone following a pre-medical track or anyone interested in public health!"

Dementia Program at Life Care—Edinburgh, Scotland

Shelby Rakoski

"I interned at LifeCare in Edinburgh, Scotland in the St. Bernard's club, an Adult Care Service for people diagnosed with dementia. I spent a lot of time talking to the clients reminiscing, discussing cultural differences, and participating in group activities aimed to stimulate cognition. I learned folk songs from the clients, they taught me Scots (which is harder to understand at first than one would think), and I was able to learn about all of the local favorites to eat and grab a pint. This experience broadened my knowledge and blessed me with happy memories of people I met. It was one of the best experiences of my life."
